

L315™

On-/Off-Highway Wide-Base Drive Radial
Designed for severe-service all-wheel-drive vehicles

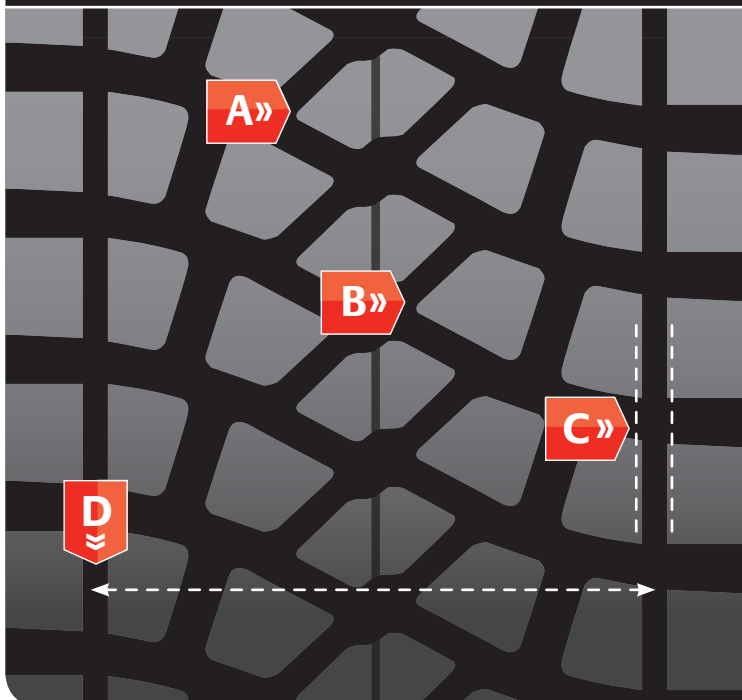

Outstanding Traction ■ Long Tread Life ■ Excellent Retreadability

PRECISELY THE RIGHT TIRE.

The key words behind this rugged tire are “performance,” “enhanced” and “robust.” It’s engineered for the tough terrain and extra duty of all-wheel-drive vehicles like front-discharge cement mixers, dump trucks and specialty oil field rigs. Featuring an aggressive lug tread design and an enhanced tread compound that contributes to long original tread life, you’ll be on solid ground on or off highway with the wide-base L315.

L315 Innovations

A Aggressive Lug Tread Design
.....
Thick block-style lugs with multiple gripping edges provide outstanding traction in mud, gravel and soft-surface conditions throughout the original tread life.

B Enhanced Tread Compound
.....
Helps resist cuts, chips and tears for original tread life.

C Shoulder Tread Groove
.....
Helps to reduce tread tearing and chunking at the shoulder area, and reduces shoulder tread wear.

D Deep, Wide Design
.....
Allows for higher payload, provides solid traction, increased tread life, and improved handling.

Cap/Base Compounding

Delivers long wear life while providing resistance to cuts, chips, tearing and irregular wear.

Optimized Tread Angles

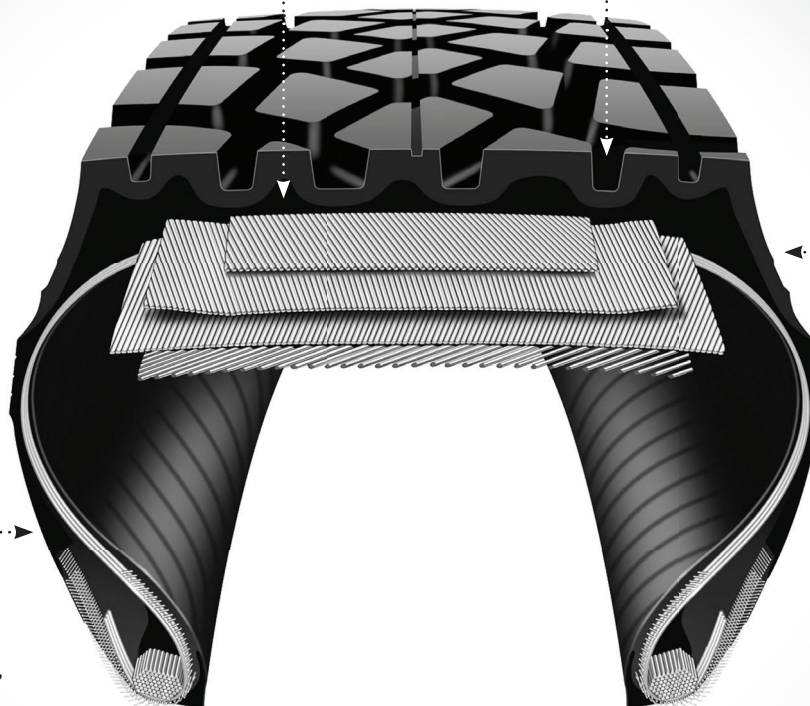

Helps prevent stones and job site debris from becoming trapped within the tread, enhancing durability and retreadability.

Reinforced Sidewall & Shoulder Protection

Resists casing damage for improved durability and retreadability.

Optimized Casing Construction

Helps control casing growth, providing a better footprint for long wear life and improved irregular wear resistance, casing durability and retreadability.
