

# R238™ *Premium All-Position Radial*

Designed for Regional Pickup and Delivery Service

**Scrub Resistance ■ Long Wear Life ■ Durable**

## Precisely the Right Tire

The Bridgestone R238 is an all-position radial tire that stands up to the harshness of severe, high scrub environments in regional pickup and delivery applications. Protective features in the casing and tread design help resist damage from curbing and maneuvering scrub, contributing to long tread life. The pattern complements the Bridgestone R268 Ecopia all-position tire, which is available in larger sizes.

## R238 Features

- A** **Special Groove Shape**  
.....  
Designed for improved rib tearing resistance.
- B** **Stone Rejector Platforms**  
.....  
Help provide resistance to stone drilling in two center grooves to protect belts and enhance casing durability.
- C** **Waved Channel Design**  
.....  
A wavy design in the channel reduces groove bottom strain, combating the initiation and spread of irregular wear.
- D** **Optimized Rib Distribution**  
.....  
Ribs are uniquely proportioned for added stiffness, which helps reduce irregular wear throughout the footprint.

## R238 Features

### High Scrub Tread Compound

Enhances resistance to tread scrubbing, leading to increased tread life.

### NanoPro-Tech™ Compound

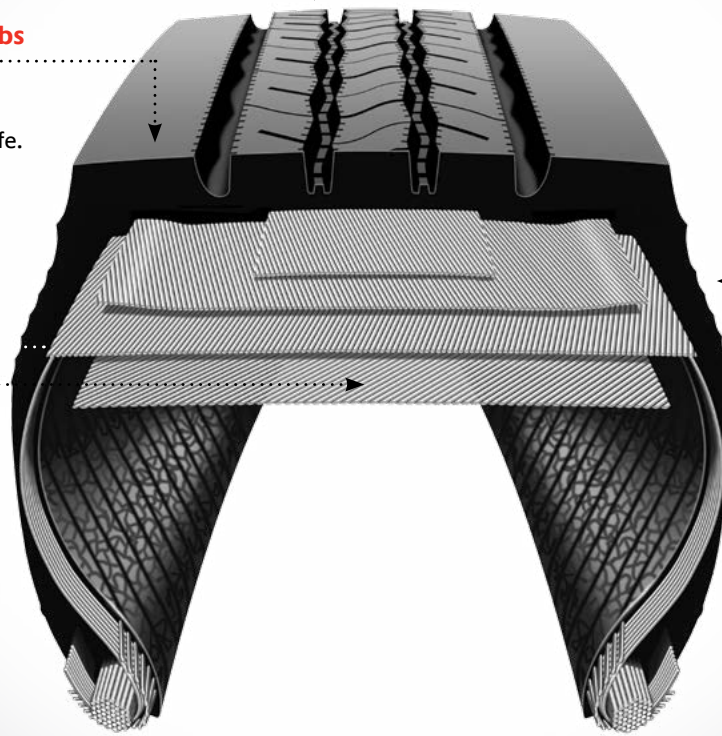

Patented NanoPro-Tech polymer technology limits energy loss for improved rolling resistance.

### Wide, Solid Shoulder Ribs

Help deliver enhanced resistance to maneuvering scrub and increased tread life.

### Wider Belts

Wide belts extend to the shoulder area, which helps to reduce the occurrence of both irregular shoulder wear and casing damage.

### Sidewall Protector Ribs

Preserve casing durability by fighting curbing damage with thick ribs on both sidewalls.
